## Summary

Consultant Developer at Thoughtworks with 3+ years of experience engineering high-scale distributed systems, cloud-native microservices, event-driven architectures, and modern web applications. Experienced in Go, Python, React, TypeScript, Kubernetes, Docker, RabbitMQ, Kafka, AWS, GCP, and automated CI/CD pipelines. Strong advocate of Test-Driven Development (TDD), clean code principles, and scalable system design.

## Technical Skills

**Languages:** Go (Golang), Python, TypeScript, JavaScript, SQL, HTML5, CSS3, Bash

**Backend & Architecture:** REST APIs, Microservices, Event-Driven Architecture, Distributed Systems, System Design, GraphQL

**Frontend:** React.js, Redux, Material UI, Tailwind CSS, Flutter, Responsive Design

**Cloud & Platform:** AWS, GCP, Kubernetes, Docker, Terraform, Helm, Jenkins, GitHub Actions, CI/CD, Nginx

**Data & Messaging:** PostgreSQL, MySQL, Redis, RabbitMQ, Kafka, Elasticsearch, MongoDB

**Testing & Methodologies:** Test-Driven Development (TDD), Domain-Driven Design (DDD), Clean Architecture, Agile, Jest, Go Testing

## Professional Experience

### Thoughtworks

*Consultant Developer*

India  
October 2022 – Present

- Architect and deliver scalable Go and Python microservices with strict SLAs, low latency, and high availability across enterprise client engagements.
- Design event-driven asynchronous architectures with RabbitMQ and Kafka to handle distributed telemetry and message processing pipelines.
- Orchestrate containerized workloads using Docker and Kubernetes on AWS and GCP with automated zero-downtime deployments.
- Champion Test-Driven Development (TDD), clean code principles, and pair programming to maintain high code quality and test coverage.
- Automate end-to-end CI/CD pipelines with GitHub Actions and Jenkins, cutting deployment cycle times by over 50%.
- Mentor and guide incoming software engineers across core technologies, distributed systems, and design patterns.

### Software Engineering

*Software Developer*

India  
2021 – 2022

- Designed and implemented scalable RESTful APIs and microservices in Go and Node.js serving thousands of daily active users.
- Engineered responsive, accessible frontends in React.js and TypeScript paired with Material UI and modern state management.
- Integrated Redis caching mechanisms and optimized database queries in PostgreSQL and MySQL to reduce query latency by 40%.
- Configured Docker containers and automated staging/production deployment pipelines with GitHub Actions.
- Authored comprehensive unit and integration test suites using Jest, Supertest, and Go testing framework.

## Featured Projects & Open-Source

- **Reward Management System:** Multi-tenant loyalty and points management platform with automated reward calculation, distributed transaction logs, and real-time alerts.
- **Live Request Watcher:** Real-time network traffic inspector and stream logger for capturing, inspecting, and debugging distributed HTTP and WebSocket requests across microservices.
- **RabbitMQ Golang Event Pipeline:** Resilient event-driven message queuing framework and asynchronous task worker system in Go with backpressure, retry strategies, and DLQ handling.
- **Learn TDD in React:** Enterprise-grade clean architecture blueprint demonstrating Test-Driven Development (TDD) principles in modern frontend apps.

## Education

### M.B.M. Engineering College

*Bachelor of Engineering in Electronics and Electrical Engineering | CGPA: 8.2/10*

Jodhpur  
July 2022
